考题正确率

一.单选题 ( 题数: 7, 共35.0分)

1	Which of the following is the media with the slowest transmission speed?
A、 Coaxial cable B、 Optical fiber C、 Twist pair D、 Radio waves	
正确答案: C	正确: 11 人 错误: 30 人 正确率: 26.8% 查看统计详情
2	Which method is the best option for home user to surf Internet?
A、 LAN B、 ADSL C、 Wireless WAN D、 PSTN	
正确答案: B	正确: 12 人 错误: 29 人 正确率: 29.3% 查看统计详情
3	Which protocol of the followings is best for Wireless Sensor Network?
A、 Zigbee B、 802.11	

- C、RFID
- D、Bluetooth

正确答案：A

正确：7人

错误：34人

正确率：17.1%

查看统计详情

4

Which of the followings related to 5G is not correct?

- A、Expected speed up to 10Gbps
- B、More faster & reliable than 4G, actually, 5G is more like 4G+IoT
- C、Commercially available application is already on the way
- D、5G is just the update of 4G

正确答案：D

正确：31人

错误：10人

正确率：75.6%

查看统计详情

5

Which of the followings on CDMA is correct?

- A、Mobile communication standard of 5G
- B、If codes are orthogonal and then they can be sent at the same time,which is the base of signal modulation for CDMA.
- C、No difference from TDMA
- D、Widely used as part of 2G networks

正确答案：B

正确：34人

错误：7人

正确率：82.9%

查看统计详情

6

Which of the followings that relate to Satellite Navigation and Position is not correct?

- A、美国全球定位系统（GPS）、俄罗斯格洛纳斯卫星导航定位系统（GLONASS）、欧洲伽利略卫星导航定位系统（Galileo）、中国北斗卫星导航系统（BDS）。
- B、BDS can provide the service of sending a short text message.
- C、BDS #3 has 30 satellites, and provides three main services--Positioning, Navigation, and Timing.
- D、BDS cannot provide short message service.

正确答案：D

正确：29人

错误：12人

正确率：70.7%

查看统计详情

7

Which one of the followings is correct?

- A、The higher the frequency, the longer the wave length.
- B、The higher the frequency, the weak the penetration(穿透) ability.
- C、The higher the frequency, the wider the bandwidth.
- D、The higher the frequency, the stronger the diffraction(衍射) ability.

正确答案：C

正确：19人

错误：22人

正确率：46.3%

查看统计详情

二.填空题（题数：3，共25.0分）

1

A noise 8-kHz channel (H) with 30dB SNR, please figure out the Capacity( ) kbps(只保留整数部分) of the channel.

正确答案

第一空: 80

[查看统计详情](#)

2

If Baud rate ( symbol rate ) is 300 Baud per second, and one symbol can carry 2 bits ( $V=4$ ), please figure out data rate ( ) bps.

正确答案

第一空: 600

[查看统计详情](#)

3

There are 2 users communicating with basestation, and their code chips are shown as follows respectively.

A: ( -1-1-1+1+1-1+1+1 )      B : ( -1-1+1-1+1+1+1-1 )

If S receives code chip: ( -1+1+2+1-1-2+1-1 ), Please figure out what data user B sending ( ).

Please note: 1 means sending "1"; 0 means sending "nothing"; -1 means sending "0".

正确答案

第一空: nothing

[查看统计详情](#)

### 三.判断题 (题数: 8, 共40.0分)

1

When we say 100Mbps which means the capacity of the channel is 100M.

正确答案: 正确

正确: 5 人

错误: 35 人

正确率: 12.5%

[查看统计详情](#)

2

The lower the frequency is, the **stronger** the rake (diffraction effect衍射) capability is.

正确答案: 正确

正确: 15 人

错误: 25 人

正确率: 37.5%

[查看统计详情](#)

3

The higher the frequency of signal is, the **sharper** the signal amplitude attenuation (信号幅度的衰减).

正确答案: 正确

正确: 18 人

错误: 22 人

正确率: 45.0%

[查看统计详情](#)

4

Satellites for GPS are Geostationary Satellites(地球同步卫星).

正确答案: 错误

正确: 17 人

错误: 23 人

正确率: 42.5%

[查看统计详情](#)

5

FDMA is better than TDMA.

正确答案: 错误

正确: 29 人

错误: 11 人

正确率: 72.5%

[查看统计详情](#)

6 5G's signal frequency is higher than 4G's.

正确答案: **正确**    正确: 5 人    错误: 36 人    正确率: 12.2%    [查看统计详情](#)

7 Beidou satellite navigation chips, modules, antennas, boards and other basic products are the basis for Beidou system applications.

正确答案: **正确**    正确: 38 人    错误: 2 人    正确率: 95.0%    [查看统计详情](#)

8

Beidou popular applications such as mobile phones and wearable devices have gradually become new highlights of Beidou applications in recent years.

正确答案: **正确**    正确: 39 人    错误: 1 人    正确率: 97.5%    [查看统计详情](#)
